Description

Background

To keep documents flowing for reconciliation, clients are notified whenever transactions are missing supporting documents.

- A **real-time notification** is triggered when a transaction is flagged as Missing Attachment, while
- Monthly reminders highlight any outstanding transactions that still require documentation. Notifications direct clients to a dedicated document management dashboard, providing a clear overview of missing attachments, recently uploaded documents, and outstanding actions.

From there, clients can review affected transactions and upload supporting documents individually or in bulk.

Goal

Notify the client (in-app + push) in real time when a transaction is Missing Attachment and remind them monthly while documents are still outstanding, routing them to the Missing Attachment list to bulk-upload.

Acceptance Criteria

1. Real-time notification when a transaction is flagged Missing Attachment

GIVEN a transaction is flagged Missing Attachment
WHEN the flag is set
THEN the client receives a real-time notification via in-app and push (see Channels table)

1. Monthly reminder for still-missing documents

GIVEN transactions remain Missing Attachment
WHEN the monthly reminder runs
THEN the client receives a monthly reminder (in-app + push) summarising the outstanding transactions

1. Notification redirects to the Missing Attachment list

GIVEN the client opens a missing-document notification or reminder
WHEN they action it
THEN they are taken to the dedicated Missing Attachment list (Client Story C1)

1. Bulk upload from the list

GIVEN the client is on the Missing Attachment list from a notification
WHEN they provide the required files
THEN they can bulk-upload them (Client Story C3)

1. Reminders stop when resolved

GIVEN a transaction becomes Attachment Added (matched)
WHEN reconciliation is satisfied for it

THEN it is excluded from further notifications and monthly reminders

Rules

Notification Types

Type	Trigger	Cadence
Ongoing (real-time)	Transaction flagged Missing Attachment	Immediately on flag
Periodic reminder	Transactions still Missing Attachment	Monthly (To be Confirmed with Accountant)

Channels

Channel	Used
In-app	Yes
Push	Yes
Email / WhatsApp	No (notifications are in-app + push)

Notes

- Client platform only.
- Reminders are monthly and continue until the transaction is Attachment Added.
- Grouping: the real-time notification is a grouped count ("X transactions need documents") to avoid noise
- Monthly reminder timing (To confirm which day of the month).

Missing-Document Notifications & Reminders
