Description

Background

On the client side, the client tracks their purchase (supplier) invoices in the Suppliers Invoices List. Clients can only upload purchase documents — they cannot edit invoice data. Editing is accountant-only, because most clients are not accounting-trained and editing risks mis-categorising the COA and wrong reconciliation, creating rework for the accountant.

Goal

Give the client a Suppliers Invoices List to view and track their purchase invoices — summary totals, overdue/incomplete alerts, search, sortable columns, and read-only invoice detail — with view, upload, and pay access only (no editing).

Acceptance Criteria

1. View the Suppliers Invoices List with summary totals

GIVEN the client opens the Suppliers Invoices List
WHEN the list loads
THEN the system displays the total payment amounts (To be paid / Done)
AND an alert is shown for overdue payments
AND the invoice table is displayed with the columns in the Columns table below, paginated and sorted by Due Date by default

1. Search the list

GIVEN the Suppliers Invoices List is displayed
WHEN the client types into Search
THEN the list is filtered by the search term across Invoice Number, Supplier, Status, and similar fields

1. Sort the table

GIVEN the Suppliers Invoices List is displayed
WHEN the client clicks a sortable column header
THEN the table re-orders by that column per the Columns table (ascending/descending)

1. Status and completeness are shown with alerts

GIVEN invoices are displayed in the list
THEN each invoice shows its Status (To Pay, Paid, Rejected), with Overdue shown as a flag on a To Pay invoice past its due date
AND each invoice shows its Completed state (No Match detected / Missing Details / File Imported), which is informational only and does not block paying
AND the system alerts the client on overdue payments and on incomplete invoices

1. Open an invoice to view read-only details

GIVEN the client selects an invoice from the list
WHEN the invoice opens
THEN its details are displayed read-only
AND no fields are editable

1. Client has view, upload, and pay access only

GIVEN the client is viewing the Suppliers Invoices List
THEN they can view, search, sort, open (read-only), upload purchase documents, remove or replace a document they uploaded by mistake, and pay an invoice
AND they cannot edit, reclassify (COA), or amend any invoice data (accountant-only)

Rules

Columns

Column	Display Rule	Sorting	Required
Invoice Number	INV-YYYY-#####	Sortable (asc/desc)	Yes
Supplier Company Name	Saved supplier company name linked to the invoice	Sortable A–Z	Yes
Status	To Pay / Paid / Rejected (Overdue = flag on a To Pay invoice past its due date)	—	Yes
Due Date	MMM DD, YYYY (e.g. May 30, 2026)	Sortable by date	Yes
Issue Date	MMM DD, YYYY (e.g. May 12, 2026)	Sortable by date	Yes
Amount in Invoice Currency	Currency abbreviation + amount, 2 decimals (e.g. HKD 1,250.00)	Sortable by amount	Yes
Completed	No Match detected / Missing Details / File Imported	Sortable (Incomplete / Complete)	Yes

Summary & Alerts

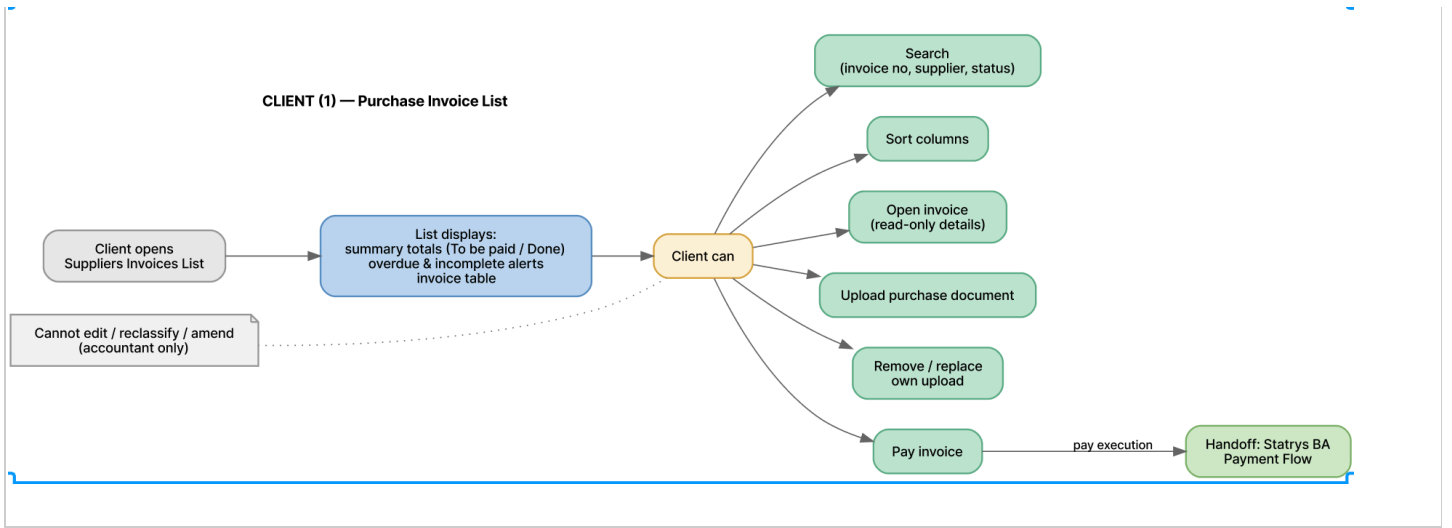

Element	Behaviour
Payment totals	Displays To be paid / Done amounts
Overdue alert	System alerts on overdue payments (To Pay past Due Date)
Incomplete alert	System alerts on incomplete invoices (driven by Completed); informational only

Client Permissions

Action	Allowed?
View / Search / Sort / Open (read-only)	Yes
Upload purchase document	Yes
Pay an invoice (via Payment Flow)	Yes
Remove / replace own uploaded document (uploaded by mistake)	Yes
Edit / Reclassify (COA) / Amend invoice data	No — accountant only

Notes

- Clients can only upload purchase documents and pay them; all editing of invoice data is accountant-only (rationale: untrained clients risk mis-categorising COA and wrong reconciliation, creating rework).
- Invoice completeness (Missing Details / No Match) is informational only — it does not block the client from paying.
- The list is paginated; default sort is by Due Date.
- Entry point: from the client's purchase area the client can open the Supplier List or the Supplier (Purchase) Invoice List; this story covers the invoice list.
- Out of scope: the pay / upload status flow detail (separate "Upload Purchase Invoice and Status Flow" story), creating a supplier, and adding a supplier credit note (separate stories).
