Description

Background

On the client platform, the client adds purchase invoices by uploading them — clients never create or edit invoice data. A document can be brought in three ways (in-app upload, WhatsApp, or email forwarding); the system OCR-reads it, validates it, and lists it as a payable invoice the client can pay directly via the Statrys Business Account. Accountant review and booking happen on the separate accountant platform.

Goal

Let the client upload a purchase invoice through any of the three intake channels, have it OCR-read and validated into the Suppliers Invoices List with status Imported (payable), and pay it directly via the Statrys BA Payment Flow.

Acceptance Criteria

1. Initiate an upload via one of three channels

GIVEN the client selects Import Invoice
WHEN they choose an intake channel
THEN they can upload a file (drag-drop), send via WhatsApp, or send via email (forwarding address) (see Intake Channels table)
AND only the accepted file types and size are allowed (see File Rules table)

1. System reads and validates the document

GIVEN a document has been submitted through any channel
WHEN the system runs OCR to read and map the invoice fields and validates the file
THEN if the file is invalid or a duplicate, an error is shown asking the client to upload again
AND if the file is valid, it is attached to the invoice

1. Successful upload creates a payable invoice

GIVEN a valid uploaded document
WHEN processing completes
THEN the invoice is created with status Imported (payable) and appears in the Suppliers Invoices List

1. Supplier matching

GIVEN OCR processes the uploaded invoice
WHEN it attempts to match a supplier
THEN if a supplier is detected it is linked automatically
AND if no supplier matches, the system suggests Add Supplier, but the invoice can still be saved unmatched

1. Pay an Imported invoice directly

GIVEN an invoice with status Imported (payable)
WHEN the client chooses to pay it
THEN they are taken to the Statrys BA Payment Flow to pay, with no accountant confirmation required
AND on full settlement the status changes to Paid

Rules

Intake Channels

Channel	Behaviour
Upload file	In-app drag-drop / file picker
WhatsApp	Send the document via the connected WhatsApp number
Email	Forward the document to the dedicated forwarding address

File Rules

Rule	Value
Accepted formats	PDF, JPG, PNG
Max size	25 MB (To be confirmed with Tech)
Duplicate / invalid	Blocked — error shown, client uploads again

Client-Visible Status

Status	Meaning
Imported (payable)	Uploaded and listed; client can pay directly
Paid	Fully settled via the Statrys BA Payment Flow
Rejected	Set by the accountant on their platform (display only here)

Notes

- Client platform only. Accountant review, booking, and reconciliation happen on the separate accountant platform; the uploaded invoice is simply available there (handoff).
- Clients can only upload and pay — they cannot edit or reclassify invoice data (accountant only).
- WhatsApp and email intake rely on the channels configured in Purchase Settings.
- WhatsApp and email intake to be setup in Purchase Settings
- Partial payment via the BA Payment Flow — allowed
