Description

Background

On the client platform, the client manages their suppliers from the Supplier List: viewing, searching, opening read-only, and creating suppliers (manually or from an uploaded invoice's details). Clients cannot edit suppliers — editing and archiving are accountant-only. The client may remove a supplier only if they created it and it has no linked invoices yet (an "undo my mistake" action).

Goal

Give the client a single Supplier List to view, open (read-only), search, sort, and create suppliers, with duplicate prevention and the ability to remove an own-created unlinked supplier — while editing and archiving stay accountant-only.

Acceptance Criteria

1. View the Supplier List and open a supplier read-only

GIVEN the client opens the Supplier List
WHEN the list loads
THEN suppliers are displayed with the columns in the Columns table
WHEN the client selects a supplier
THEN its details are displayed read-only with no editable fields

1. Search and sort the list

GIVEN the Supplier List is displayed
WHEN the client types into Search or clicks a sortable column header
THEN the list is filtered or re-ordered accordingly

1. Create a supplier (manual or from invoice)

GIVEN the client selects Create Supplier (from the list) or Add Supplier (from an uploaded invoice)
WHEN the Supplier Form opens
THEN it is blank when opened manually, or pre-filled with the OCR-extracted details when opened from an invoice (all editable)
AND the required fields are per the Supplier Form Fields table

1. Save with validation and duplicate prevention

GIVEN the client completes the Supplier Form
WHEN they select Save
THEN the system validates that all required fields are completed and blocks Save with flags if any are missing
AND if the Company Registration Number matches an existing supplier, Save is blocked and the duplicate is flagged

1. From-invoice creation links the invoice on save

GIVEN a supplier created from an uploaded invoice
WHEN it is saved
THEN the supplier appears in the Supplier List
AND it is automatically matched and linked to the originating invoice (clearing its no-supplier state)

1. Remove an own-created supplier; editing/archiving are accountant-only

GIVEN a supplier the client created that has no linked invoices
WHEN the client removes it
THEN it is deleted from the Supplier List
AND if it has any linked invoices, removal is blocked (archiving is accountant-only)
AND the client can never edit a supplier (accountant only)

Rules

Columns

Column	Display Rule
Company Name	Supplier company name
Contact Name	Primary contact (First + Last Name)
Country	Supplier country
Invoices	Count of invoices linked to the supplier

Supplier Form Fields

Field	Required
Company Name	Yes
Company Registration Number	Yes
Default Invoice Currency	Yes
Email Address	Yes
Address	Yes
City	Yes
Zip / Postal Code	Yes
Country	Yes
First Name	Yes
Last Name	Yes
Phone Number	No
Website	No
State	No

Creation Methods

Method	Entry point	Form state
Manual	Supplier List → Create Supplier	Blank form
From invoice	Uploaded invoice → Add Supplier	Pre-filled with OCR-extracted details

Client Permissions & Removal

Action	Allowed?
View / open (read-only) / Search / Sort	Yes
Create supplier (manual or from invoice)	Yes
Remove own-created supplier with no linked invoices	Yes
Edit supplier	No — accountant only
Archive / remove supplier with linked invoices	No — accountant only

Notes

- Client platform only. Editing and archiving suppliers happen on the accountant platform.
- The "from invoice" method is triggered by the Add Supplier suggestion in the Upload Purchase Invoice flow (Client Story 2).
- Clients can only upload and pay invoices and create/remove-own suppliers — they cannot edit invoice or supplier data.
