Description

Background

A supplier credit note is a document the supplier sends the client (for an overcharge, return, etc.) that reduces what the client owes. On the client platform the client only uploads it — exactly like a purchase invoice. OCR reads it, the system suggests the supplier's outstanding bills, and it is saved as Draft and handed to the accountant, who decides offset vs refund and posts the entries on the accountant platform.

Goal

Let the client add a supplier credit note by upload, have it OCR-read and validated, auto-suggest the supplier's outstanding bills for linking, and save it as Draft for the accountant to process.

Acceptance Criteria

1. Add a supplier credit note by upload

GIVEN the client has received a supplier credit note
WHEN they add it
THEN only upload is offered (drag-drop or email) — there is no manual creation form
AND only the accepted file types and size are allowed (see File Rules table)

1. System reads and validates the document

GIVEN a credit note document has been submitted
WHEN the system runs OCR to read and map the fields and validates the file
THEN if the file is invalid or a duplicate, an error is shown asking the client to upload again
AND if valid, the document is attached

1. Auto-suggest the supplier's outstanding bills

GIVEN a valid credit note
WHEN it is processed
THEN the system auto-suggests the supplier's outstanding bills
AND the client can link one or more bills, or save the credit note unlinked

1. Saved as Draft and handed to the accountant

GIVEN the client confirms the basic info and selects Add Credit Note
WHEN it is saved
THEN the credit note is saved as Draft and sent to the accountant for processing
AND the offset-vs-refund decision and the journal entries are made by the accountant, not the client

Rules

Intake Channels

Channel	Behaviour
Upload file	In-app drag-drop / file picker
Email	Forward the document to the dedicated forwarding address

File Rules

Rule	Value
Accepted formats	PDF, JPG, PNG
Max size	25 MB
Duplicate / invalid	Blocked — error shown, client uploads again

Client Permissions

Action	Allowed?
Upload credit note (drag-drop / email)	Yes
Link to outstanding bills / save unlinked	Yes
Decide offset vs refund	No — accountant only
Edit credit note data / post entries	No — accountant only

Notes

- Client platform only. The accountant decides offset vs refund and posts the journal entries on the accountant platform.
- Linking the credit note to an invoice carries the supplier/client info and the invoice number onto the credit note.
- Mirrors the Upload Purchase Invoice flow (Client Story 2); no manual creation form for the client.
