Description

Background

Once credit notes exist against an invoice — whether to cancel an unpaid invoice or refund a paid one — clients need to look them up and check the details. In Block 1 (Sales Invoice), credit notes are surfaced from the invoice they relate to, so the client can review them and trace the link back to the invoice.

Goal

Let a client open and review a credit note (read-only) from its linked invoice's "Related documents", see its key details, jump to the linked invoice, and send it.

Acceptance Criteria

1. See related credit notes on an invoice

GIVEN an invoice that has one or more linked credit notes
WHEN the client opens that invoice
THEN the system lists its credit note(s) under "Related documents"

1. Open a credit note as a read-only preview

GIVEN the list of related credit notes
WHEN the client selects one
THEN the system displays a **non-editable** credit note preview showing its details (see Displayed Details below)

1. View the linked invoice

GIVEN the credit note preview
WHEN the client selects to view the related invoice
THEN the system opens the linked invoice's view screen

1. Send the credit note

GIVEN the credit note preview
WHEN the client selects "Send Credit Note"
THEN the system opens the send flow (email / link / download) per STORY5_send_sales_invoice.md

Rules

Displayed Details (read-only)

Field	Shown
-------	-------

Amount	Credit note total
Client name	Carried over from the linked invoice
Issue date	Credit note issue date
Related invoice	Linked invoice number, with an action to open the invoice

Notes

- Surface: client side is the **mobile app**; the Operation Manager **back office is web**.
- **Entry point**: from the linked invoice's "Related documents" only (no standalone credit-note list in this story).
- **Applies to any invoice that has credit notes** — cancellation credit notes (on Cancelled or partially-credited Awaiting Payment invoices) and refund credit notes (on Paid / Pending Refund / Refunded invoices).
- The credit note preview is **non-editable**; its data reflects the linked invoice.
- **Send** reuses the invoice send flow (Story 5); there is no separate download action on this screen beyond what the send flow offers.
- Out of scope: creating a credit note (Story 6), refunding (Story 7), and editing a credit note.

Things Not Clear

- Credit note fields = number, type (cancellation vs refund), linked invoice number, line items, reason, total. Same shape as an invoice preview plus the link back and reason.
- The preview shows the credit note's own status (draft / issued / pending refund / refunded / applied).
