Description

## Background

Clients need a central place in the Accounting feature to view and manage their sales invoice records. The Sales Invoice List provides an overview of all invoices for a company, with summary tiles, filters, and search to help users locate specific records quickly.

This story applies to **both the Client App and the Admin App** — the Admin App shows the same list scoped to the selected client company.

## Goal

Allow an authorised user to view the Sales Invoice List, review summary tiles, filter the list by date and status, and search by client name or invoice number.

## Acceptance Criteria

### 1. Sales Invoice List is accessible via the Sales tab

GIVEN a user is logged in and has access to the Accounting feature  
WHEN the user selects the Sales tab  
THEN the system displays a dropdown including a Sales Invoice option  
AND selecting Sales Invoice navigates the user to the Sales Invoice List screen

### 1. Summary tiles display at the top of the list

GIVEN a user is viewing the Sales Invoice List  
WHEN the screen loads  
THEN the system displays the three summary tiles defined in the Summary Tiles table below  
AND each tile reflects real-time values based on the invoices in scope for that company

### 1. Invoice list displays with correct columns and sorting

GIVEN a user is viewing the Sales Invoice List  
WHEN the list renders  
THEN all invoices for the company are displayed according to the Invoice List View Rules table below  
AND each sortable column can be toggled between ascending and descending order

### 1. Filters can be applied and cleared

GIVEN a user is viewing the Sales Invoice List  
WHEN the user selects one or more filters  
THEN the list updates in real time to show only invoices matching all selected filters  
AND each active filter is displayed as a chip with a remove button  
AND clicking the remove button on a chip clears that filter and refreshes the list  
AND clearing all filters returns the list to its default unfiltered state  
AND filter options follow the Invoice List Filter Rules table below

1. Search narrows the list by client name or invoice number

GIVEN a user is viewing the Sales Invoice List  
WHEN the user types in the search bar  
THEN the system filters the list to show only invoices where the client company name or invoice number matches the search input  
AND clearing the search field returns the full list

1. Filters and search apply simultaneously

GIVEN a user has one or more filters active  
WHEN the user also types in the search bar  
THEN the list shows only invoices that satisfy both the active filters and the search input  
AND removing the search or a filter updates the list independently without resetting the other

Rules

Summary Tiles

| Title                    | Description                                               | Value Displayed                                                                  |
|--------------------------|-----------------------------------------------------------|----------------------------------------------------------------------------------|
| Outstanding Invoices     | Invoices with status Awaiting Payment                     | Total amount + count of invoices                                                 |
| Overdue                  | Invoices with status Awaiting Payment past their due date | Total amount + count of invoices                                                 |
| Paid in the last 30 days | Invoices with status Paid within the last 30 rolling days | Total amount + count of invoices; includes a period dropdown to adjust the range |

Invoice List View Rules

| Column              | Description                              | Format / Display Rule                                                  | Sortable                     |
|---------------------|------------------------------------------|------------------------------------------------------------------------|------------------------------|
| Invoice Number      | Invoice reference number                 | INV-YYYY-#####                                                         | Yes — ascending / descending |
| Client Company Name | Name of the client linked to the invoice | Saved client company name                                              | Yes — A–Z / Z–A              |
| Issue Date          | Date the invoice was issued              | MMM DD, YYYY (e.g. May 12, 2026)                                       | Yes — ascending / descending |
| Due Date            | Date the invoice is due                  | MMM DD, YYYY (e.g. May 30, 2026)                                       | Yes — ascending / descending |
| Amount              | Invoice amount in invoice currency       | Currency abbreviation + amount to 2 decimal places (e.g. HKD 1,250.00) | Yes — ascending / descending |
| Status              | Current invoice status                   | Displayed as a coloured tag: Draft / Awaiting Payment / Paid / Void    | No                           |

Invoice List Filter Rules

| Filter     | Description                                           | Options                                                                                       |
|------------|-------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Issue Date | Filter by the date the invoice was issued             | This week / Last week / This month / Last month / This year / Custom (From–To calendar modal) |
| Status     | Filter by invoice status; multiple selections allowed | Draft / Awaiting Payment / Paid / Cancelled                                                   |

Filter Chip Behaviour

| State                    | Display                                                  |
|--------------------------|----------------------------------------------------------|
| No filters applied       | Filter dropdowns shown; no chips visible                 |
| One filter applied       | One chip shown with label and × remove button            |
| Multiple filters applied | One chip per active filter; each independently removable |
| All filters cleared      | List returns to default view; no chips shown             |

Notes

- This story covers the Sales Invoice List screen only. Creating, editing, posting, cancelling, sending, paying, and downloading invoices are out of scope.
- This story applies to both the Client App and Admin App. In the Admin App the list is scoped to the selected client company.
- Empty, loading, and error states follow existing platform behaviour and are not re-specified here.
- Golive flag: this feature must be turned off on Prod at launch.
