Description

Background

A credit note is issued against an existing invoice and must present a consistent, complete document to the client. Some fields are fixed or auto-populated from the related invoice and account settings; others are editable by the client. This story defines every field on a credit note, its source and editability, the appearance customisation options, and the Credit Notes List — the central register used by the client and accountant to track, apply, and manage all issued credit notes.

Goal

Define all fields on a credit note document, their source and editability; provide appearance customisation options; and give the client a Credit Notes List with the columns, filters, statuses, and actions required to manage the full credit note lifecycle.

Acceptance Criteria

1. Auto-populated fields are pre-filled on credit note creation

GIVEN a credit note is being created against an existing invoice
WHEN the credit note form opens
THEN all fields marked as Auto-populated in the Credit Note Fields table below are pre-filled without client input
AND system-generated fields (CN number, related invoice number, related invoice date, CN type, client information, customer address) are read-only and cannot be edited directly on the form

1. Client can edit all editable fields before issuing

GIVEN the credit note form is open
WHEN the client reviews the pre-filled content
THEN they can edit all fields marked as Editable in the Credit Note Fields table below
AND changes to line items are reflected in real time in the calculated totals
AND changes are reflected in real time in the document preview

1. Client can customise the document appearance

GIVEN the client is creating or previewing a credit note
WHEN they access the customisation options
THEN they can apply the customisations listed in the Customisable Document Elements table below
AND customisations set at account level (logo, company details) are applied automatically without requiring action per credit note

1. Client can view all credit notes in the Credit Notes List

GIVEN the client navigates to the Credit Notes section
WHEN the list loads
THEN all issued credit notes are displayed with the columns defined in the Credit Notes List Columns table below
AND the list can be filtered by customer, status, date range, and amount
AND the list can be sorted by issue date, CN number, amount, and remaining balance
AND each row links to the full credit note detail view

1. Client can take actions on a credit note from the list

GIVEN the client selects a credit note in the Credit Notes List

WHEN they choose an action

THEN they can apply it to an open invoice if the status is Open or Partially Applied

AND they can download it as a PDF at any status

AND they can void it if the status is Open and it has never been applied

AND a voided credit note is marked Cancelled and becomes fully read-only with no further actions

1. Issued invoices display a CN badge when a credit note exists

GIVEN a credit note has been raised against a sales invoice

WHEN the client views the Sales Invoice List

THEN the linked invoice displays a CN badge

AND clicking the badge navigates directly to the credit note detail view

Rules

Credit Note Fields

Field	Description	Field Type	Data Format	Default Value	Required	Editable
Company Info	Default company information from invoice settings	System-generated	Text	From invoice settings	Yes	No
Company Logo	Company logo from invoice settings	System-generated	Text	From invoice settings	No	No
Credit Note Number	Unique identifier for the credit note	System-generated unique no.	Text	CN-YYYY-#####	Yes	No
Credit Note Issue Date	Credit note date	Calendar modal	DD/MM/YYYY	Current date	Yes	Yes
Related Invoice Number	Linked invoice number	System-generated	Text	According to linked invoice	Yes	No
Related Invoice Issue Date	Linked invoice issue date	System-generated	DD/MM/YYYY	According to linked invoice	Yes	No
Credit Note Type	Record type tag	System-generated	—	Sales credit note	Yes	No
Client Information	Client details from linked invoice	System-generated text	Text	According to linked invoice	Yes	No
Customer Address / Contact Info	Client address and contact details	System-generated text	Text	According to linked invoice	Yes	No
Item Name	Credit note line item title	Prefilled text field	String	According to linked invoice	Yes	Yes
Description	Related line description	Prefilled text field	String	According to linked invoice	Yes	Yes
Account	Chart of account assignment	Dropdown / selection	—	According to linked invoice or user selection	Admin app only	Admin app only
Quantity	Quantity of item	Text field	Number	According to linked invoice	Yes	Yes
Unit	Item unit	Dropdown	•	According to linked invoice	No	Yes
Unit Price	Unit price in invoice currency	Text / number field	Number	According to linked invoice	Yes	Yes
Amount	Line amount in invoice currency	System-calculated	Number, 2 decimal points	Quantity × Unit Price	Yes	No
Total Amount Converted to Functional Currency	Converted amount	System-generated uneditable text	Number, 2 decimal points	Calculated	Accountant only if invoice currency differs from functional currency	No
Discount per credit note	Invoice discount	Prefilled input from linked invoice	Number / percent	According to linked invoice	No	No

Subtotal	Sum before discount/tax	System-generated uneditable text	Number, 2 decimal points	Calculated	Yes	No
Total Discount	Discount value	System-generated uneditable text	Number, 2 decimal points	Calculated	Display only if discount exists	No
Total	Total excl. VAT + VAT amount	System-generated uneditable text	Number, 2 decimal points	Calculated	Yes	No

Credit Note Link Rules

Condition	Expected Behaviour	Notes
Credit note is created successfully	Credit note is linked to the selected invoice	Link must be retained in system
Credit note is created from invoice flow	Credit note references the linked invoice number and client information	Applies to traceability

Customisable Document Elements

Element	Where configured
Company logo	Account settings — applies globally
Company name and address	Account settings — applies globally
Colour scheme / accent colour	Per CN or account default
Footer text / payment terms note	Per CN or account default

Credit Notes List — Columns

Column	Notes
CN Number	Sequential (CN-YYYY-#####) — links to CN detail view
Issue Date	Date the CN was created
Customer	The customer the CN was issued to
Related Invoice	The original invoice the CN was raised against
Original Amount	Full value of the CN in invoice currency
Applied Amount	Amount offset against invoices to date
Remaining Balance	Original amount minus applied amount
Status	See CN Status Rules below

CN Status Rules

Status	Meaning	Editable	Actions available
Open	Issued, not yet applied	Yes	Apply to invoice, Edit, Download PDF, Void
Partially Applied	Part of the CN has been applied	Yes	Apply remainder, Edit, Download PDF
Fully Applied	CN fully offset against one or more invoices	No	Download PDF only
Refunded	CN settled by cash refund to customer	No	Download PDF only
Cancelled	Voided by client before any application	No	None

Notes

- Issuer fields (company name, logo, address) are managed in account settings and apply globally to all credit notes. They cannot be overridden per credit note.
- Client fields are carried from the related invoice and are read-only on the credit note. If the client's details need correcting, that is done on the client record, not on the credit note form.
- All total and subtotal fields are computed automatically and are never directly editable.
- Currency is locked to the currency of the related invoice.
- The Credit Notes List is a separate view from the Sales Invoice List. Linked invoices show a CN badge in the Sales Invoice List (AC6).
- A Void / Cancel action is only available while the CN status is Open. Once any portion has been applied, cancellation is blocked.
- This story covers field definitions and the list view only. The creation and edit flow is covered in Story 1 (Create & Edit Sales Credit Note).
- Golive flag: this feature must be turned off on Prod at launch.
